CORE

1. Login & Authentication

Secure tenant-aware authentication. Users sign in with email + password. Supports multi-company tenancy where the same credentials can access multiple companies.

Key Features

- Email + password authentication
- JWT-based auth with refresh tokens
- Password reset via email link
- Multi-tenant scoped sessions
- Role-based access control (RBAC) on every route
- Session management — active sessions list & invalidation

Screenshots & Walkthroughs

1.1

Login page — Flowentra sign-in screen

- › Email and password fields
- › Branded with company logo
- › Tenant-aware routing on success

CORE

2. Dashboard & Builder

Configurable home dashboards. Build per-role dashboards from widgets (KPIs, charts, lists), pin views, and switch between built-in and custom dashboards.

Key Features

- Custom dashboard builder (drag & drop widgets)
- Per-user / per-role default dashboard
- Built-in dashboards — Service, Sales, Field, HR, Finance, Executive
- Global period selector with comparison to previous period
- Realtime KPI refresh via SignalR
- KPI cards, charts, recent activity feeds
- Public sharing of dashboards via token URL
- Switcher — top-bar dropdown to flip between dashboards
- Tour — 28-step first-time user product tour

Screenshots & Walkthroughs

2.1

Dashboard Home — default landing view

- › Top bar with company switcher and notifications
- › Sidebar navigation with all modules
- › KPI tiles and chart widgets

2.2

First-time user product tour — welcome modal (Step 0 of 28)

- › Modal: 'Welcome to Flowentra! 🙌'
- › Two actions: Skip tour or Next (Step 1 of 28)
- › Tour can be replayed from the user profile menu

2.3

Tour Step 2 — Navigation Sidebar callout

- › Anchored callout points at the left sidebar with arrow
- › Explains section grouping: Workspace, CRM, Service, System
- › Footer controls: Skip tour, Back, Next

2.4

Product tour in action — highlights UI regions step by step

2.5

Default Service dashboard — KPIs, charts, map and trends in one view

- › Service Orders by Status — bar chart
- › Tasks by Status — donut chart
- › Dispatch Locations — geo widget on map
- › Monthly Trend — area sparkline

2.6

Dashboard switcher dropdown — flip between built-in dashboards or create a new one

- › Lists every dashboard available to the current user
- › Active dashboard highlighted in brand orange
- › + Create New Dashboard at the bottom

2.7

Custom Dashboard Manager — empty state

- › Empty state: 'No dashboards yet. Create one to get started.'
- › 15 widget types available: KPI, Bar, Line, Area, Pie, Donut, Funnel, Gauge, Heatmap, Map, Radar, Sparkline, Table, Background

2.8

Dashboard Edit mode — drag, resize and reorder widgets

- › Toolbar: Rename, + Add Widget, Period selector, Auto-refresh, Grid settings, Cancel, Save
- › Each widget shows drag handle, swap-data-source icon, × remove button

2.9

Rename Dashboard modal — change the dashboard title in place

- › Single 'Dashboard Name' text input pre-filled with current name
- › Cancel / Save actions

2.10

Add Widget — pick from 14 widget types

- › Tabs: Add Widget (raw types) and Templates (preset widget + data source)
- › Types: KPI Card, Sparkline, Bar Chart, Pie Chart, Donut, Line, Area, Funnel, Radar, Stacked Bar, Heatmap, Data Table, Map, Gauge

2.11

Templates tab — ready-made widgets bound to a data source

- › One-click presets: Sales Revenue, Total Contacts, Sales by Status, Offers Pipeline, Conversion Rate, Sales Trend, Tasks by Status, Service Orders by Status
- › Clicking a template adds the widget instantly

2.12

Configure Widget — set title, data source and metric

- › Widget Title, Data Source dropdown, Metric dropdown (Count, Sum, Average, Min, Max)
- › + Add Widget finalises and drops onto the grid

2.13

Grid Settings — fine-tune spacing, density and animation

- › Preset: Compact / Comfortable / Spacious
- › Sliders: Spacing, Row Height, Corner Radius
- › Card Style: Default / Flat / Elevated / Bordered
- › Widget Entrance animation: None / Fade / Slide / Scale / Bounce

2.14

Global period selector — applies to every widget at once

- › Options: All Time, Last 7/30/90 Days, Last 6 Months, Last Year, Custom Range
- › Custom Range opens a date-range picker; selection is persisted

2.15

Save confirmation — dashboard returns to view mode

- › Toast 'Dashboard saved successfully' appears bottom-right
- › Layout, period, auto-refresh, grid settings and widget configurations are all persisted

CRM

3. Contacts (CRM)

Unified directory of Persons, Companies and Suppliers. Each contact carries identity, fiscal IDs (CIN, Matricule Fiscale), address with geolocation, status and a 360° history across Offers, Sales, Service Orders, Purchases and Notes.

Key Features

- Three contact types — Person, Company, Supplier
- Address with interactive geolocation map
- 360° tabs on every contact — Installations, Offers, Sales, Service Orders, Purchases, Notes
- Dedicated Suppliers area at /dashboard/suppliers
- Tunisian fiscal fields — CIN and Matricule Fiscale
- List with KPIs, full-text Search, advanced Filters, Map view
- Bulk Import — Dynamic (any Excel headers) or Structured Import
- Multi-company aware

Screenshots & Walkthroughs

The screenshot displays the K.ROSSIER CRM interface. The sidebar on the left contains navigation links for WORKSPACE (Dashboard, Articles, Calendar, Documents, Human Resources), CRM (Contacts, Suppliers, Purchases, Sales, Projects), SERVICE (Services, Time & Expenses, Planner), and SYSTEM (Workflow, Dynamic Forms, Lookups, Settings). The main content area is titled 'Contacts' and features a search bar, a 'Create' button, and a 'Total Contacts' KPI tile showing 28 contacts. Below this, there are tabs for 'Persons' and 'Companies'. A table lists contacts with columns: CONTACT, COMPANY, EMAIL, PHONE, TYPE, STATUS, and ACTIONS. The table shows 28 contacts, with the first few being 'Individual' and 'Active'.

Work Information

Professional details and status

3.3

Add Contact (Person)

> Identity: First / Last name, Position, Email, Phone, Mobile

> Address: Street, City, Country, Postal code + map preview

> Fiscal: CIN, Tax ID (Matricule Fiscale)

> Work info: Department, Hire date, Status, Tags

3.4

Person detail — 360° tabs

- › Tabs: Overview / Installations / Offers / Sales / Service Orders / Purchases / Notes
- › Header card: avatar, name, status, type, favorite toggle
- › Overview: contact info, address with embedded map, recent activity feed

3.5

Company detail

- › Company-specific fields: Legal name, Tax ID, Industry, Size, Website
- › Linked installations / offers / sales / service orders / purchases tabs

3.6

Supplier detail

- › Supplier-only fields: payment terms, RS rate category, bank account
- › Purchases tab: PO history, receipts, invoices, outstanding balance
- › Performance: on-time delivery %, avg lead time, total spend YTD

3.7

Edit Contact modal

- › Switch type Person ↔ Company ↔ Supplier
- › Address with interactive map: click to drop pin or 'Use My Location'
- › Unsaved-changes guard if you try to close

3.8

Suppliers list (/dashboard/suppliers)

- › Same UX as Contacts list, scoped to type=Supplier
- › Extra columns: RS category, Outstanding balance, Last PO date

3.9

Add Supplier

- › Supplier Type radio: Person / Company
- › Supplier-specific: RS category, default payment terms, bank IBAN

3.10

Bulk Import Contacts

- › Two modes: Dynamic Import (any Excel headers) or Structured Import (fixed template)
- › Drag-and-drop file zone with size + row count preview

3.11

Advanced Filters drawer

- › Status: Active / Inactive; Type: Person / Company / Supplier
- › Multi-select Tags filter with color chips
- › Boolean filters: Favorites only, Has email, Has phone, Has geolocation

3.12

Contacts Map view

- › Markers clustered by zoom level; click marker to open mini-card
- › Filter by type directly on the map toolbar

3.13

Contact Notes modal

- › Rich-text note body, author + timestamps
- › Inline edit, soft-delete with undo toast

3.14

Tags manager

- › Color picker (10 preset palette + custom hex)
- › Delete cascades to remove the tag from all contacts

3.15

Delete Contact confirmation

- › Soft-delete by default (contact archived, restorable)
- › Lists linked records that keep the historical reference

3.16

Dynamic Import — column mapping

- › Auto-detected headers from the uploaded .xlsx
- › Drag headers onto target fields
- › Preview first 10 rows after mapping; errors highlighted
- › Duplicate strategy: Skip / Update by email / Create anyway

INVENTORY

4. Articles & Catalog

Product & service catalog — the single source of truth for any line item used in Offers, Sales, Purchases, Stock and Service Orders. Each article has identity, pricing, taxation, supplier links, stock thresholds and a bulk import/export system.

Key Features

- Type — Product (stocked) / Service (non-stocked)
- Stock fields — Quantity on hand, Min/Max stock, Reorder point
- List page — KPIs, search, filters (Category, Type, Status), Table/Grid view, bulk-select
- Inventory Transactions — Stock In/Out/Transfer/Adjustment
- Pricing — Selling price HT, Cost price, Margin %, default Discount %, VAT %
- Suppliers — primary supplier + alternates, supplier reference, last purchase price
- Bulk Import — Dynamic or Structured (.xlsx)
- Audit fields — created by, updated by, soft delete

Screenshots & Walkthroughs

4.1

Articles & Materials — unified catalogue with KPI cards, filters and pagination

- › KPI strip: Materials, Services, Low Stock, Total Items
- › Columns: Type icon, Name, Reference/Category, Status, Stock, Price, Location, Actions
- › Pagination with selectable page size

4.2

Article Detail — overview with stock levels, pricing and audit info

- › Article Information: Reference, Category, Group, Description
- › Stock Levels: Current Stock, Minimum Stock, Cost/Sell Price, Location, Supplier
- › Audit Information: Created/Modified Date and By

4.3

Edit Article modal — Material/Service toggle with full property form

- › Article Type tabs: Material / Service
- › Required fields: Name, Category, Status
- › Inventory Details: Current Stock, Minimum Stock Level, Cost Price, Sell Price
- › Sourcing: Supplier, Location, Group, Sub-Location, Notes

4.4

Edit Article — expanded form view with all fields

4.5

Record Inventory Transaction — stock in / out / transfer dialog

- › Transaction Type: Stock In, Stock Out, Transfer, Adjustment, Damaged, Lost, Return
- › Quantity, To Location, Reason (required for audit trail)
- › Reference field for PO / SO / invoice numbers

4.6

Record Inventory Transaction — Stock In / Out / Transfer / Adjustment detail

- › Ties to reference documents (PO, SO)
- › All transactions feed the Articles audit log and Stock Management history

4.8

Stock Management — gauge cards per material with quick actions

- › Circular gauge showing % of capacity per material
- › Card actions: Add Stock, Remove Stock, View History
- › Status: Good ($\geq$ min), Low ($<$ min), Critical ($=$ 0)

4.9

Import Articles — Dynamic Import (map your own columns)

- › Upload an Excel file with custom headers and map them after upload
- › Supported formats: Excel (.xlsx, .xls)

4.10

Import Articles — Structured Import with templates

- › Download Empty Template or Template with Examples
- › Drop the filled template to bulk-create or update articles

4.11

Inventory & Services — Filters drawer expanded

- › Filter by Type (All / Material / Service) and Location
- › Combine with Search and pagination for fast lookup

4.12

Delete confirmation — irreversible action guard

- › 'This action cannot be undone. This will permanently delete the article.'
- › Cancel (secondary) and Delete (destructive primary)

4.13

Error boundary — graceful fallback when a page crashes

- › 'We hit an unexpected snag' centered card
- › Go back (primary) and Return home actions
- › Reference ID shown for support traceability

INVENTORY

5. Stock Management

Multi-warehouse stock control. Tracks every movement (in/out/adjust/transfer), supports per-warehouse quantities, low-stock alerts and replenishment proposals.

Key Features

- Warehouses — multiple physical or logical locations per company
- Manual adjustment — single-line or bulk with reason picklist
- Reservations — soft-reserve stock for an Offer/Sale/Service Order
- Replenishment proposal — auto-generates draft Purchase Orders
- Stock transactions log — date, type, source document, quantity, before/after balance
- Inter-warehouse transfer — two-step confirm (sent / received)
- Low-stock alerts — daily job compares quantity vs min stock

Screenshots & Walkthroughs

5.1

Stock Management — at-a-glance grid with current levels

- › Top KPI strip: Total Materials, Critical, Low Stock and Healthy Stock counts
- › Each card: name, group, fill-level gauge, current quantity, status badge
- › Per-card actions: Add Stock, Remove Stock, View History

5.2

Filters bar — narrow the grid by Status and Location

- › Status: All / Critical / Low Stock / Healthy
- › Location: filter by warehouse, vehicle or any configured stock location

5.3

Replenish Stock dialog — Add or Remove with optional notes

- › Toggle between Add Stock and Remove Stock
- › Shows current quantity, asks for delta and optional notes
- › Submitting writes a fully-audited row to the Stock Transactions log

5.4

Stock Transaction History — full audit log per material

- › Lists every add, remove, sale deduction, transfer and adjustment
- › Each entry records previous → new stock, reason, reference, performer and timestamp

PROCUREMENT

6. Purchases (Procure-to-Pay)

End-to-end Procure-to-Pay workflow tailored for the Tunisian fiscal context: Purchase Order → Goods Receipt → Supplier Invoice → Payment, with three-way matching, retenue à la source (RS), TEJ / Facture en Ligne compliance, and a full audit trail.

Key Features

- Purchase Orders — multi-line items, payment terms, fiscal stamp, auto totals
- Goods Receipts — full or partial reception against a PO, automatic stock movement creation
- Compliance dashboard — RS yearly total, Facture en Ligne counts, TEJ sync status
- Audit Log — every create/update/delete with user, timestamp and description
- PO statuses — Draft → Pending → Approved → Sent → Partially Received → Received → Closed → Cancelled
- Supplier Invoices — 3-way match, retenue à la source (RS) computed automatically
- Reports — Supplier Performance, Price Evolution, Invoice Aging, Monthly Spending

Screenshots & Walkthroughs

6.1

Purchases hub — KPIs + recent activity

- › KPI tiles: Open POs, Pending receipts, Unpaid invoices, This-month spend
- › Quick links: New PO, New Receipt, New Invoice, Compliance, Reports, Audit Log
- › Compliance widget: RS YTD, Facture en Ligne pending, TEJ sync status

6.2

Purchase Orders list

- › Columns: PO #, Supplier, Order date, Expected delivery, Status, Total HT, TVA, Total TTC
- › Status pipeline as colored chips (Draft / Pending / Approved / Sent / Partially Received / Received / Closed / Cancelled)
- › Row actions: View, Edit, Duplicate, Cancel, Generate Receipt, Generate Invoice, Download PDF

OPERATIONS

7. Service Orders

End-to-end field service order lifecycle. Manages Jobs, Dispatches, Time & Expenses, Materials, Attachments, Checklists and Activity from creation through invoicing.

Key Features

- Status flow: Pending → Ready for Planning → Scheduled → In Progress → Technically Completed → Ready for Invoice → Invoiced → Closed
- Detail tabs — Overview, Jobs, Dispatches, Time & Expenses, Materials, Attachments, Checklists, Activity
- PDF report generation and email sending
- Three view modes — Table, Cards, Map
- Auto-creation from Sales (when sale contains service items)
- Geolocation-based Map view

Screenshots & Walkthroughs

The screenshot displays the K.ROSSIER Service Orders interface. The top navigation bar includes a search bar, a 'Create' button, and various filters like 'All companies', 'Online', 'Ask AI', and a user profile. The left sidebar shows a 'WORKSPACE' menu with options like Dashboard, Articles, Calendar, Documents, and Human Resources, as well as a 'SERVICE' menu with 'Service Orders' highlighted. The main content area shows a 'Service Orders' section with a KPI strip displaying 'Total Orders: 6', 'Active Orders', 'Completed', and 'Total Value: 3,345.85 TND'. Below this is a table of service orders with columns: ORDER, COMPANY, CUSTOMER, STATUS, RELATED SALE, and CREATED. The table lists five orders, all with a status of 'Technically Completed' or 'Partially Completed'. The bottom of the table shows 'Showing 1 to 5 of 6 results' and pagination controls for 'Previous', '1 of 2', and 'Next'.

ORDER	COMPANY	CUSTOMER	STATUS	RELATED SALE	CREATED

HR

8. Human Resources (HR)

Complete HR suite tuned for Tunisian payroll law (CNSS, CSS, IRPP, abattements). Manages the full employee lifecycle — Recruitment → Hire → Attendance → Leaves → Payroll → Bonuses → CNSS declaration → Performance review.

Key Features

- Employee directory with payroll-readiness segmentation
- Leaves — request workflow, calendar, balances, manager approvals
- Bonuses & Deductions — typed entries, period-bound, feed payroll
- Departments & Org Chart
- Recruitment pipeline — Kanban from Applied → Hired
- Attendance — Daily entries, List & Matrix views
- Payroll runs — CNSS, CSS, IRPP progressive brackets, PDF payslips
- CNSS — configurable rates, monthly declaration, CSV export
- Performance Management — Goals, Review Cycles, Reviews

Screenshots & Walkthroughs

8.1

HR dashboard — KPIs and shortcuts to every HR sub-module

- › KPI tiles: Active employees, Pending leaves, Attendance today (%), Estimated monthly payroll (TND)
- › Quick actions: Add employee, Run payroll, Approve leaves, Export CNSS
- › Charts: Headcount evolution, Absences by type, Payroll cost trend

8.2

Employees list with payroll-readiness segmentation

- › Columns: Employee (avatar + name), Position, Department, Contract type, Salary, CNSS #, Status
- › Tabs: All / Payroll-ready / Incomplete / On leave / Terminated
- › Row actions: Open detail, Edit, Generate payslip, Add bonus/deduction, Mark as terminated

Workspace: Dashboard, Articles, Calendar, Documents, Human Resources (Employees, Absences, Payroll, Bonuses, CNSS, performance, recruitment, Reports, Settings, Attendance, Departments), CRM (Contacts, Suppliers, Purchases, Sales, Projects), SERVICE (Services, Time & Expenses)

Employee Detail: hend kharez
QA & Testing Department | Senior QA Engineer | Full Time

Profile | Salary | CNSS | Bonuses | Leaves | Documents | History

Personal Information
 Profile picture: Change Photo
 First name: hend | Last name: kharez
 Email: kharraz.hind@gmail.com | Phone: 21968506

Work Information
 Department: QA & Testing Department | Position: Senior QA Engineer
 Employment type: Full time | Hire date: mm/dd/yyyy
 Contract type: Select contract type | Contract end date: mm/dd/yyyy
Required for CDD / Siae. Leave empty for CDI.

8.3

Employee detail — multi-tab file (Profile / Salary / CNSS / Bonuses / Leaves / Documents)

- › Profile: identity, CIN, contact, address, hire date, contract end date, manager, department
- › Salary: base gross, allowances (transport, meal, housing), abattements
- › CNSS: CNSS number, affiliation date, employee + employer rate snapshot

K-ROSSIER Search [Create] All companies Online Ask AI

Search... KK

Attendance
Monthly tracking (hours, overtime, absence) in Tunisia

Dashboard | Import CSV | Add entry

Summary:
 Total records: 0 | Hours worked: 0.0 | Overtime hours: 0.0 | Late: 0

Filters:
 Month: 5 | Year: 2026 | Employee: All employees

Views: List | Matrix

No attendance records for this month
 Import from Excel or add a manual entry to start tracking.

8.4

Monthly attendance — List & Matrix views

- › Matrix view: rows = employees, columns = days; color-coded statuses (present / absent / late / remote / leave)
- › Period picker (month/year), department filter, employee search
- › Auto-computed totals: worked hours, overtime worked, late count, absences

8.5

Add Attendance Entry modal

- › Fields: Employee, Date, Check-in, Check-out, Break (min), Status (present/absent/late/remote)
- › Optional: Notes, Overtime hours (auto-feeds payroll)
- › Prevents overlapping entries on the same day

PRODUCTIVITY

9. Dynamic Forms

Visual drag-and-drop form builder. Create bilingual (EN/FR) forms with 15+ field types, release them for internal or public use, collect submissions, export responses and generate branded PDFs.

Key Features

- 15+ field types: Text, Textarea, Number, Email, Phone, Checkbox, Radio, Dropdown, Date, Signature, Rating, Content Block, Page Break
- Draft / Released / Archived status workflow
- Response inbox — CSV/Excel export, PDF per response
- Attach as checklist to Service Orders, Dispatches, Offers
- Bilingual (EN/FR) forms with language switcher
- Public link for unauthenticated submission
- Convert responses to CRM records (Contact, Offer, Sale)

Screenshots & Walkthroughs

9.1

Dynamic Forms — list of all forms with status, field count and last updated

- › Columns: Name, Status (Draft / Released / Archived), Fields count, Last Updated, Share, Actions
- › Toolbar: Search, Status filter, + Create Form
- › Click a row to open the form preview

9.2

Row actions menu — Preview, Edit, Duplicate, View Responses, Make Public, Archive, Delete

- › Edit is blocked on Released forms — restore to Draft first
- › Make Public exposes the form at `/public/forms/:slug` for unauthenticated submission
- › Delete is a soft delete (form goes to Archived state)

Form Responses

Export to Entity

Export Responses

Form Responses

#	SUBMITTED BY	SUBMITTED AT	LINKED ENTITY	ACTIONS
1	1	Mar 17, 2026 15:38	-	View Export PDF

9.6

Form Responses — every submission with submitter, timestamp and linked entity

- › Columns: #, Submitted By, Submitted At, Linked Entity, Actions (view / export PDF)
- › Top-right actions: Export to Entity and Export Responses (CSV / Excel)

9.7

Response detail modal — read-only view of one submission with PDF export

- › Header: Submitted By, Submitted At
- › One card per field showing the answered value (or 'Not answered')
- › Export as PDF button generates a branded PDF of that single response

OPERATIONS

10. Workflow Automation

Visual no-code/low-code automation engine. Design end-to-end business processes — wire entity Triggers to Actions through Conditions, Loops, Switches and Parallel branches. Includes an AI workflow builder, live execution debugger, version history and real-time SignalR streaming.

Key Features

- Visual canvas — React-Flow-based builder with pan/zoom, mini-map, snap-to-grid, multi-select, undo/redo
- Trigger types — Webhook, Scheduled (CRON), Status-change (Offer/Sale/SO/Dispatch), Entity-created
- Condition nodes — IF/Else, Switch, Loop, Parallel, Try/Catch
- Workflow versioning — every Save bumps version; restore prior versions
- Execution History — paginated list of every run with status and timing
- Workflow Calendar — plan interventions with drag-and-drop rescheduling
- Node palette — Triggers, Entities, Actions, Conditions, Integrations — searchable
- Action nodes — Create Sale/SO/Dispatch, Update Status, Send Email, HTTP Request, Notify
- Build with AI — natural-language to graph generation
- Live execution debugger — color-coded nodes with input/output JSON per step
- Dispatch Board — Kanban by status with Calendar / Map views

Screenshots & Walkthroughs

10.1

Workflow Builder — three-pane layout (Node Palette / Canvas / Toolbar)

- › Top-right toolbar: Build with AI, Debug, Duplicate, Export, Import, Save, Edit, Stop
- › Left palette: Triggers (6), Entities (5), Actions (8), Conditions, Integrations
- › Canvas: React-Flow nodes color-coded by type with smart edges
- › Pre-built default business workflow: Offer Accepted → Create Sale → ... → Sale Closed

10.2

Live canvas — full default business workflow with palette open

- › Shows the canonical 'order-to-cash + service' flow
- › Triggers in orange, Conditions in yellow, Actions in green/blue
- › Each node displays its type chip, FROM/TO statuses and 1-line summary

10.3

Build with AI — natural-language to graph

- › 4 starter prompts: confirmed-sale email, offer follow-up after 3 days, dispatch-completed notification, daily 9am summary
- › Free-text 'Describe your workflow...' input
- › Apply to Canvas commits the generated nodes/edges in one click

10.4

Build with AI — full modal with starter prompts

- › Header 'Build with AI' with branded hex icon
- › 4 starter cards with pre-written prompts
- › Free-text textarea + send button; Reset and Apply to Canvas footer actions

10.5

Edit mode — protected canvas with explicit Save / Cancel

- › Yellow 'Editing' badge while edit mode is on
- › Cancel discards changes (with unsaved-changes guard)
- › Save bumps the workflow version
- › All edits gated behind the Edit button

10.6

Version History — restore, compare, fork prior versions

- › Lists every version with author, date, status and short diff summary
- › Restore promotes an old version to active; Compare opens side-by-side graph diff
- › Fork creates a new Draft from any prior version

10.7

Version History tooltip on the clock icon

- › Hovering the clock icon shows 'Version History — Current Workflow'
- › Click opens the full version history popover

10.8

Node palette — Conditions, Communication, AI and Integration categories

- › Conditions: If/Else, Switch, Loop
- › Communication: Send Notification, Email, Request Approval, Delay, Human Input Form, Wait for Event
- › AI: AI Email, AI Analyzer, AI Agent, Custom LLM
- › Integration: Dynamic Form, Data Transfer, HTTP Request, Code (JavaScript)

10.9

Workflow Calendar — Mois / Semaine / Jour / Tableau of interventions

- › Period switcher + alternative table view
- › Planifier intervention CTA opens the dispatch creation dialog
- › Drag-and-drop reschedule; conflict highlighting; intelligent planning hints

10.10

Workflow Calendar — empty state before interventions are planned

10.11

Dispatch Board — Kanban by status with Calendar / Map views

- › Columns: Scheduled, En route, In progress, Finished, Cancelled
- › Drag a card to change status; writes to /api/dispatches
- › Inventory search; Calendar view & Map view (Mapbox/Leaflet) toggles

10.12

Dispatch Board — empty state before any dispatches are created

INTEGRATIONS

11. External Endpoints

Receive and process inbound webhooks and form submissions from external sources. Each endpoint gets a unique signed URL and API key. Inbound payloads are logged, reviewable and convertible to CRM records.

Key Features

- Unique slug URL per endpoint (auto-generated)
- Quick-start templates: Landing page (vehicle quote), Generic contact form, B2B Lead capture, Webhook passthrough
- Inbound log: Date/time, Method, Source IP, Status code, Payload preview
- Bulk: Mark all as read, Clear all logs, Export CSV
- API key with reveal / copy / rotate actions
- Allowed HTTP methods per endpoint (GET/POST/PUT/DELETE)
- Convert inbound payload to Offer / Sale / Contact in one click

Screenshots & Walkthroughs

KROSSIER External APIs

Create and manage custom API endpoints to receive data from external sources.

Summary Cards:

- Total Endpoints: 2
- Active: 2
- Received Today: 0
- Total Received: 1

Search endpoints...

NAME	SLUG	STATUS	RECEIVED	CREATED	ACTIONS
Contact form	contact-form-6fe19d	Active	1	5/2/2026	...
QA Test Endpoint Two	qa-test-endpoint-two-2b5af1	Active	0	4/26/2026	...

11.1

External Endpoints list

- › KPIs: Total Endpoints, Active, Received Today, Total Received
- › Table: Name, Slug URL, Status (Active/Inactive toggle), Methods, Received count, Last received
- › Search + filter; quick actions: View, Edit, Copy URL, Test, Delete

Quick start templates

Click a template to pre-fill the form. You can edit anything after.

Landing page — vehicle quote

Capture name, email, phone, vehicle, requested service, description and company from a client...

Generic contact form

Simple name + email + message capture for any website contact form.

Lead capture

B2B lead form with company, role, and interest.

Webhook passthrough

Accept any payload (no schema). Useful for third-party webhooks.

Create Endpoint

Endpoint Name
e.g. Contact Form Webhook

URL Slug
e.g. contact-form
Used in the public URL. Only lowercase letters, numbers, and hyphens.

Description
What is this endpoint for?

Active

11.2

Create Endpoint — templates + custom

Quick-start templates: Landing page, Generic contact form, B2B Lead capture, Webhook passthrough

Custom mode: name, description, allowed HTTP methods, Active toggle, optional JSON Schema

Auto-generated slug + API key on save

Receives messages from a website contact form.

Active
Endpoint can receive data when active

Allowed Methods

11.4

Edit Endpoint

› Editable: name, description, allowed methods, Active toggle, schema

› Slug is read-only after creation

› Rotate API key with confirmation (old key invalidated immediately)

› Danger zone: Delete endpoint (cascade deletes inbound log)

SYSTEM

12. Lookups

Centralized configuration for all dropdown lists and pick-lists used across modules. Manage values for Task Status Types, Priorities, Article Categories, Leave Types, Locations, Work Types and more.

Key Features

- Two-pane layout — left category browser, right item list
- Add / Edit / Delete items with name, active toggle, sort order
- Active/Inactive status — inactive values preserved on historical records
- Categories: Task Status Types, Priorities, Article Categories, Article Groups, Service Categories, Leave Types, Locations, Offer Sources, Work Types, Expense Types, Project Types, Form Categories, Document Types
- Default value per category (star toggle)
- Extra fields per category (Paid for Leave Types, Completed for Task Statuses)

Screenshots & Walkthroughs

12.1

Lookups — category browser (left) with empty detail pane

- › Two-pane layout: left list of all lookup categories, right detail pane
- › Each category row shows name and item count
- › Sidebar entry 'Lookups' under SYSTEM group

12.2

Task Status Types — values table

- › Columns: Default (star toggle), Name, Completed, Status (Active/Inactive), Actions
- › Star = mark default value (one per category)
- › Status badge: Active values are pickable in the app

12.3

Priorities — with default value highlighted

- › Used by Tasks, Offers, Service Orders, Dispatches and Deals priority pickers

12.4

Article Categories — taxonomy used by Articles & Inventory

- › 14 entries (BODY, CLEANING, DETAILING, ELECTRICAL, INSPECTION, MECHANICAL, PAINTING...)
- › Drives Articles module filtering and reporting

12.6

Service Categories — applied to service-type articles & service orders

10 entries (Electrical & Diagnostics, Inspection & Support, Maintenance & Care, Mechanical, Painting & Body...)

12.7

Leave Types — extra Paid/Unpaid column for HR payroll integration

- › Paid badge: drives whether the leave deducts from salary in payroll runs

12.8

Locations — physical locations / branches used across modules

- › Used by Stock Management, Dispatcher and Service Orders to attach a site

12.9

Full category list — all lookup categories visible

- › Scrolled view showing remaining categories: Offer Sources, Installation Categories, Work Types, Expense Types, Project Types, Form Categories, Document Types

12.10

Create New Item dialog

- › Name (required), Active toggle, Sort Order
- › Some categories add extra fields (Paid for Leave Types, Completed for Task Statuses)

12.11

Edit Item dialog — same shape as Create, prefilled

- › Renaming a value updates it everywhere it is referenced
- › Toggle Active off to retire a value without breaking historical records

OPERATIONS

13. Dispatcher & Scheduler

Interactive drag-and-drop planner for technician dispatch scheduling. Swimlane view with technician rows and time columns, supporting 1d/3d/5d/7d/14d/30d time horizons.

Key Features

- Swimlane timeline — technician rows × hour columns
- 30-day monthly calendar with technician avatars per day
- Resize job pills to extend or shorten duration
- Unassigned Service Orders right rail with search
- Rule-based auto-planner (Manage Planning)
- Time horizons — 1d / 3d / 5d / 7d / 14d / 30d
- Drag-drop to reschedule or reassign jobs
- Real-time orange line marking the current time
- Conflict detection and non-working time hatching

Screenshots & Walkthroughs

13.1

Planner — 3-day timeline view with technician swimlanes

- › Toolbar: Today shortcut, navigation, date-range picker, Range tabs (1d/3d/5d/7d/14d/30d), Zoom in/out, Status filter
- › Left column: technician roster — avatar, name, availability
- › Grid: hours 08–17 per day, vertical orange line marks the current time
- › Job pills: colored bar with priority dot + label anchored to hour slot
- › Right rail: Service Orders panel with toggle 'Service Orders / Per Installation'

13.2

7-day view — full week with weekend Day Off highlighting

- › Same swimlane grid expanded across 7 days (Wed → Tue)
- › Weekends rendered with a soft red overlay and a 'Day Off' chip per technician row

13.3

30-day overview — monthly calendar with technician avatars per day

- › Monthly grid (Sun → Sat) showing the full 30-day window
- › Each day cell stacks the avatars of technicians with at least one dispatch
- › Today highlighted with brand orange in the day number badge
- › Click any day cell to drill back into the daily / 3-day timeline

SYSTEM

14. Settings

Application settings covering Personal (Profile, Company, Security, Preferences, Offline Data) and Administration (Companies, Users, Roles, Integrations, Subscription, System Config, Sync History).

Key Features

- Profile — avatar, display name, contact details, language, timezone
- Security — password change, active session management
- Offline Data — per-module cache toggles, last refresh timestamp
- Users — invite, edit, deactivate users; role assignment
- Integrations — connected apps and API keys
- System Config — application-wide toggles
- Company — branding, logo, legal name, Tax ID, default currency
- Preferences — theme (Light/Dark/System), accent color, layout density
- Companies — multi-tenant company manager, pin default company
- Roles — RBAC with fine-grained permission matrix
- Subscription — plan details, billing, usage
- Sync History — audit of data sync operations

Save changes / Cancel actions

The screenshot shows the Krossier application interface. The top navigation bar includes the Krossier logo, a search bar, a '+ Create' button, and links for 'Online', 'Ask AI', and user settings. The left sidebar contains a search bar and a menu organized into categories: WORKSPACE (Dashboard, Articles, Calendar, Documents, Human Resources), CRM (Contacts, Suppliers, Purchases, Sales, Projects), SERVICE (Services, Time & Expenses, Planner), and SYSTEM (Workflow, Dynamic Forms, Lookups, Settings, Sync History, External APIs). The main content area is titled 'Settings' and has a sub-menu on the left with 'Profile', 'Company' (selected), 'Security', 'Preferences', and 'Offline data'. The 'Company Information' section is active, showing fields for 'Company Logo' (with an 'Upload Logo' button), 'Company Name' (filled with 'Krossier'), 'Website' (filled with 'https://krossier.com/'), and 'Phone Number' (filled with '+21629452650'). A 'Save Changes' button is at the bottom.

14.2

Company branding & identity

- › Company logo (used on PDFs, sidebar, login screen)
- › Company name, Website, Phone, Industry, Default currency
- › Appears in invoices and emails

The screenshot shows the Krossier application interface with the 'Security' sub-menu selected in the Settings sidebar. The 'Security Settings' section is active, displaying fields for 'Current Password', 'New Password', and 'Confirm Password'. Each field has a toggle icon to show or hide the password. A 'Change Password' button is located at the bottom right of the form.

14.3

Password change form

- › Current password, New password (min 8 chars, strength meter), Confirm new password
- › Update password re-authenticates and rotates the JWT; other sessions invalidated

14.4

Theme, accent color & layout density

- › Theme: Light · Dark · System (follows OS)
- › Primary color: choose accent — updates CSS variables live
- › Layout style: Compact · Comfortable
- › Sidebar collapsed toggle persisted in localStorage

14.5

Per-module offline cache toggles

- › Per-module toggles: Contacts, Articles, Offers, Sales, Service Orders, HR
- › Last cache refresh timestamp
- › Refresh now (forces re-pull) and Clear cache buttons

14.6

Companies list with pinned & target indicators

- › Multi-tenant company manager
- › Pin icon to set as default Target Company on next login
- › Edit, Delete (soft-deletes, data retained 30 days)

14.7

New Company modal

- › Company name, Legal name, Tax ID, Country, Default currency, Logo (optional)
- › Create provisions the company and switches the Target Company picker to it

14.8

Users table — search, filters, status

- › Full-text search on name + email
- › Filter by role and active/inactive status
- › Row: Edit (update profile, role, status), Deactivate (revokes access, preserves history)

14.9

Create User modal

- › First name, Last name, Email, Role (drives permissions), Initial password, Send invite email toggle
- › If blank password: sends invitation email with sign-in link

14.10

Roles — RBAC role list

- › Each role defines what its members can view, create, edit and delete across all modules
- › Built-in roles: Admin, Manager, User, Technician (read-only for field operations)

14.11

Create Role modal

- › Role name, description, and permission template picker
- › Permissions can be fine-tuned per module after creation

14.12

Role row actions menu

- › View, Edit General Info, Edit Permissions, Duplicate, Delete

14.13

Edit Role — General Info tab

- › Name, description, color tag, default dashboard override

14.14

Edit Role — Permissions matrix

- › Per-module permission rows: View / Create / Edit / Delete toggles
- › Modules: Dashboard, Contacts, Offers, Sales, Service Orders, Articles, Purchases, HR, Workflow, Dynamic Forms, Lookups, Settings...
- › Save persists the RBAC matrix and immediately affects all users in this role

14.15

Integrations — connected apps and API keys

- › List of connected integrations (Google, Microsoft, TEJ, etc.)
- › API Key management for external integrations

14.16

Subscription — plan details, billing and usage

- › Current plan, billing cycle, usage vs limits
- › Upgrade / Downgrade / Cancel actions

14.17

System Config — application-wide toggles

- › Application-wide settings and feature toggles
- › Numbering settings for documents (offers, sales, purchase orders)

14.18

Sync History — audit of data sync operations

- › Chronological log of sync operations with status, duration and record counts
